

My husband is a long haul truck driver and has been using XM Satellite Radio for over two years. It provides him with a constant clear signal for whatever station on satellite he chooses without having to constantly try to keep the signal on a regular radio station. This keeps him much safer and those around him and anyone else with satellite because he doesn't have to look down to change the station as he travels through each area. Of course, now with the great addition of the TRAVEL REPORTS AND WEATHER for the greater metropolitan areas, it makes it EVEN SAFER IN HIGH TRAFFIC AREAS. I URGE THE FCC TO REJECT THE NAB'S PETITION 04-160. Keep our truckers and citizens safer on the road. PLEASE! KEEP THE TYPE OF PROGRAMMING WE URGENTLY NEED ON OUR HIGHWAYS!
